1st Integrity, Quality and Compliance Management Training

3 - 4 May 2017

Berlin, venue tbc

IQC management is a participatory, step-by-step process to help improve Integrity, manage Quality, and ensure Compliance of small-scale WASH and WRM projects.

Too many WASH and WRM projects fail prematurely or are left unused because they are poorly planned, don't adequately meet user needs, or are weakened by corruption and integrity issues.

All in all, this means too many people who should benefit from water projects end up without the water, the capacities, or the resources they need. This must stop. Lives are at stake, as is the credibility of your organization.

IQC management is a voluntary methodology to introduce project management practices related to Integrity management, Quality control, and Compliance within your projects. It aims to:

- ✓ enhance effectiveness and impact of WASH and WRM projects,
- ✓ ensure interventions fulfil user needs,
- ✓ improve working relationships with project stakeholders,
- ✓ strengthen integrity within your projects, and
- ✓ establish a reputation as a more reliable organizations for partners and donors

Join this 1 ½ -day course. Learn how to apply IQC Management in your projects, with your constituencies and how to use IQC to extend your project portfolio.

seecon's water and management experts will consult you before the course to develop a tailor-made hands-on training and coaching to introduce you to IQC Management and help you establish how you can adapt and use the underlying management concepts to develop more effective and innovative projects.

The course is ideal for WASH and WRM project and portfolio managers, who

1) continuously seek ways to enhance the relevance and impact of their (partners) projects and/or

2) want to learn how to enhance sector governance and integrity through a tangible management and capacity development approach

To ensure a successful workshop for each organization/company; participating organization or company needs to send a team of 3-5 participants for the workshop.

Tentative Agenda

	Wednesday, 03 May	*Thursday, 04 May*
Session A 09:00 – 10:30	Introduction of course and IQC approach	Using IQC for benchmarking, Case example Kenya
Coffee break
